

CONTENTS

CHAPTER 1	THEORY OF VECTORS	1
1.1	INTRODUCTION	1
1.1.1	Linear spaces on \mathfrak{R}	1
1.1.2	The linear space \mathfrak{R}^n	6
1.2	VECTORS OF \mathfrak{R}^3	12
1.2.1	Basics of analytical Geometry of the space	12
1.2.2	Free vectors of \mathfrak{R}^3	25
1.2.3	Vectors of \mathfrak{R}^3 applied on points	37
1.2.4	Vectors of applied on straight lines	46
1.2.5	Systems of applied vectors of \mathfrak{R}^3	49
1.2.6	Systems of parallel applied vectors of \mathfrak{R}^3	59
1.3	VECTORS OF \mathfrak{R}^2	67
1.3.1	Basics of analytical Geometry of the plane	67
1.3.2	Free vectors of \mathfrak{R}^2	78
1.3.3	Vectors of \mathfrak{R}^2 applied on points	88
1.3.4	Vectors of \mathfrak{R}^2 applied on straight lines	93
1.3.5	Systems of applied vectors of \mathfrak{R}^2	98
1.3.6	Systems of parallel applied vectors of \mathfrak{R}^2	106
1.3.7	The funicular polygon	114
CHAPTER 2	BASICS OF STRUCTURES	127
2.1	ONE-DIMENSIONAL PLANE STRUCTURES	127
2.1.1	Introduction	127
2.1.2	Constraints	130
2.2	THE DEFLECTED BEAM	146

2.2.1	Introduction	146
2.2.2	Thermoelastic bending of the <i>Saint Venant's</i> solid	147
2.2.3	The deflected beam	163
2.2.4	The mathematical model	193
2.2.5	The practical calculus	211
2.2.6	Energy properties	238
CHAPTER 3 KINEMATICS		247
3.1	KINEMATICS OF STRUCTURES	247
3.1.1	Rigid bodies kinematics	247
3.1.2	The kinematic matrix	256
3.1.3	The kinematic chains	284
3.1.4	The practical calculus	300
CHAPTER 4 STATICS		331
4.1	STATICS OF STRUCTURES	331
4.1.1	Rigid bodies statics	331
4.1.2	The static matrix	342
4.1.3	Kinematic-static duality	343
4.1.4	Statics of the real structures	351
4.2	THE DISPLACEMENTS METHOD	355
4.2.1	Introduction	355
4.2.2	The restrained beam	358
4.2.3	Formulation of the solving problem	370
CHAPTER 5 ISOSTATIC STRUCTURES.....		417
5.1	CONSTRAINT REACTIONS.....	417
5.1.1	Calculus by the equilibrium equations	417
5.1.2	Calculus by the graphic <i>Statics</i>	444
5.1.3	Calculus by the principle of virtual works	469

5.2	STRESS CHARACTERISTICS.....	477
5.2.1	Calculus by the differential equations.....	477
5.2.2	Calculus by the graphic <i>Statics</i>	521
5.2.3	Calculus by the principle of virtual works	558
5.3	DISPLACEMENTS.....	562
5.3.1	Introduction	562
5.3.2	Calculus by the principle of virtual works	579
CHAPTER 6	HYPERSTATIC STRUCTURES.....	603
6.1	THE FORCES METHOD.....	603
6.2	CALCULUS BY THE CONGRUENCE.....	605
6.2.1	Classical congruence	605
6.2.2	Equations of the three moments.....	640
6.2.3	Second type congruence.....	667
6.3	CALCULUS BY THE PRINCIPLE OF VIRTUAL WORKS	675
6.3.1	Calculus of stress.....	675
6.3.2	Calculus of displacements.....	716
BIBLIOGRAPHY	725
SUBJECT INDEX	727
